Expected Outcome

Expected Outcome: In line with the objectives of the 2030 biodiversity strategy and other policies such as the common agricultural policy (CAP), successful proposals will **contribute to the take up of practices in agriculture that promote biodiversity** as well as to **effective monitoring** of farmland biodiversity to maintain and re-establish biotopes and habitats.

Scope

Scope: Projects should:

Map carbon and nature rich areas and **analyse** the effects of agricultural practices on biodiversity;

Monitor the diversity and area of habitats for farmland-dependent species, in space and time;.

Develop and test effective agri-environment measures as well as indicators and monitoring tools to determine the effectiveness of conservation measures for species and their habitats in the agricultural context;

Develop and demonstrate practical examples of agro-forestry systems and how these can be promoted through rural development programmes.

Indicative Budget

Budget: **8 million euros**

Cross-cutting priorities

Cross-cutting priorities : **Socio-economic science and humanities**

Type of action

Type of participation within a Consortium

Coordinator
Participants
Third-parties

Beneficiaries

Horizon Europe distinguishes 4 basic types of third-party support:

- 1) The purchase of goods and services
- 2) Subcontracts
- 3) Work done by “linked third parties”
- 4) Other third-party contributions

Horizon Europe project Consortium: what to look for (1)

Keep in mind that a right partner

- ✓ Could be from Academia, Industry, SMEs, NGOs, etc.
- ✓ Should be committed
- ✓ Should have skills in a **particular field**
- ✓ Should ideally (not obligatory) have previous experience in EU projects/international cooperation projects

Think about partners within your Consortium

- ✓ **WELL BALANCED:** geographical spread, expertise and type of organisation (Academia, Research centers, Industry, SMEs,...)
- ✓ **RELIABLE**

Horizon Europe project Consortium: what to look for (2)

Success factor leadership A fully integrated and balanced team

- Critical mass
- Complementary, clear roles & functions
- No overlaps, no duplications
- Experienced in EU-RTD projects (not obligatory)
- Knowledge of the reputation of core partners
- Involvement of SMEs, if relevant in the call
- Involvement of consumer organisation, European association etc. (according to the topic)
- Different interests in the project complementing each other

Where should you start in building your network?

Existing contacts vs New contacts – Pros and Cons

Existing Contacts

- Most effective
- Most reliable and predictable (worked together previously)
- Often not suitable for a planned project (especially when looking for complementary skills)

New Contacts

- More risky
- Several forms of assistance
- Easier to find suitable partners for a planned project

Where should you start in building your network?
